### Service Description

Pineapple Net's business service uses DGtek infrastructure to provide a Fibre to the Premises (FTTP) broadband internet connection to your business.

### Service Availability

Pineapple Net's business service is available in selected coverage areas and is subject to infrastructure availability at the customer's premises. If the premises is within our coverage area but the building has not been connected to DGtek's network we will endeavour to negotiate a connection with the property owner or building management. If there is no existing connection then a site survey will be required and additional connection cost may apply.

### Equipment Required

If you do not already have the required DGtek infrastructure installed at your premises, DGtek will need to connect to and install equipment inside and outside of your premises. You or an authorised person over the age of 18 will be required to be on site on the day of installation for a technician visit. This equipment

remains the property of DGtek and fees apply if this equipment is removed or damaged. You will be supplied with a suitable network termination unit upon connection. You may use your own equipment however we may not be able to provide technical support.

### Inclusions and Exclusions

#### Voice services

Pineapple Net's service does not include access to a voice service. If you require access to a voice service we have a number of partners who we can refer you to.

#### Fair Use

You may not use your services in an unreasonable or fraudulent manner or in a way that detrimentally interferes with the integrity of the network. We may take action if you breach this including suspending or cancelling your service.

### Customer Support

Our Australian-based accounts and support team are

available 9am–5pm business days.
